**1-2 Weeks**

**Expert Team**

**Holistic Audit**

**Identify attack vectors**

During our security review, we identify possible attack vectors that give real attackers the ability to attack you.

**Strengthen your business**

Strengthen your company with the newly acquired insights.

**Get a comprehensive risk analysis**

More realistic understanding of your company's risk factors and attack vectors.

**Suitability, functionality and relevance of your security concepts**

We identify security-relevant problems, determine the degree of the associated risk and give suitable recommendations for risk reduction.
